

When belt top covers are $3 / 16^{\prime \prime}$ ( 5 mm ) or more, countersinking (recessing) fastener plates is recommended.

Flexco ${ }^{\circledR}$ Bolt Solid Plate fasteners are engineered to meet the demands of the toughest material handling applications, providing a strong sift-free splice and superior holding ability. A choice of sizes accommodates belts from $3 / 16^{\prime \prime}(5 \mathrm{~mm})$ to over $15 / 16^{\prime \prime}(24 \mathrm{~mm})$ thick.

## High strength

High strength is the result of superior design and plate compression on both the top and bottom sides of the belt. High tensile strength bolts compress top and bottom plates to distribute splice tension evenly across the entire width of each fastener plate. For added strength and pull-out resistance, specially formed teeth penetrate deep into the belt carcass - without damaging carcass fibers.

## Easy installation

Field-proven templets, punches, and boring tools make it easy to quickly and accurately prepare belts for fastener installation. Fasteners are easily installed on-site using portable hand tools or power tools. Our exclusive piloted bolts also contribute to faster installation.

Market applications

- Sand • Gravel • Crushed stone
- Grain - Coal •Cement - Salt

## Flexco ${ }^{\oplus}$ Bolt Solid Plate Installation Tools and Supplies

The only tools needed for Bolt Solid Plate fastener installation are a templet and portable hand tools or power tools such as wrenches and belt punches. Impact wrench driven power tools are recommended, and can reduce installation time by at least $50 \%$.

## Bolt Breaker

## Flexco-Lok ${ }^{\circledR}$ Tape

Rigid nylon tape helps eliminate belt ripples on plied or solid-woven belting, so belts run smoothly over pulleys and under cleaners. Also helps seal splices against seepage of fines and moisture.

## $90^{\circ}$ and $45^{\circ}$ Templets

Templets are required for $90^{\circ}$ and $45^{\circ}$ Bolt Solid Plate fastener installation. Templets simplify installation by providing a guide for accurate bolt-hole placement. Lengths for all standard belt widths are available.
